Welcome to your admin assistant

Ask operational questions, review summaries, check statuses, retrieve data, and launch follow-up actions across the Kuppam Solar Site.

What is the current generation? | Show pending approvals | What is the battery state? | Summarize today's operations | Open configured actions

Summarize today's operations, pending approvals, and any follow-up actions I should review.

Here is the operational overview you requested. I have grouped the information into generation, storage, approvals, and follow-up actions so you can review the site quickly.

Today's operational summary

Kuppam Solar Site · Updated 2 minutes ago

All systems online

Current generation	Forecast vs actual	Battery SOC	Grid reliability
38 MW	-12%	72%	97%

PENDING APPROVALS

1 grid import action is waiting for your review. The current proposal is to import 8 MW for 15 minutes.

FOLLOW-UP ACTIONS

Review the battery charge rule, confirm the market connection, and validate the evening demand forecast.

Open pending approvals | Review configured actions | Ask another question

Recommended follow-up actions

3 items

1. **Review the pending grid import** — 8 MW import for 15 minutes is waiting for approval. — Open
2. **Validate the evening demand forecast** — Peak demand is expected to rise by 18% between 18:00 and 20:00. — Review
3. **Confirm the market connection** — The electricity market connection is still required for the sell surplus action. — Connect

Need more detail?

You can ask for specific data, such as "show battery history", "list configured actions", or "what is the current grid price?".

Ask about generation, storage, approvals, or follow-up actions...
