Let's configure what I can do for KUP-SOLAR-001. You can start with a recommended action or choose another action.

Discharge battery to support demand Recommended
Use stored battery energy when solar generation cannot meet site demand.

Charge battery using surplus solar
Store excess solar energy instead of exporting or curtailing it.

Import energy when supply is low
Import electricity from the grid when generation and battery supply cannot meet demand.

Create maintenance work order
Create an inspection or maintenance request when equipment health falls below a configured limit.

Support demand using Battery 1 Configuring

1 of 7 settings complete

CONFIGURED
- Objective: Maintain supply reliability

IN PROGRESS
- Battery

MISSING
- Trigger
- Limits
- Automation
- Recovery
- Notifications

Configure battery discharge to support demand.

I'll help configure when this action starts, its safety limits, automation permissions, approvals, and notifications.

- Action purpose — Not started
- Battery selection — Not started
- Trigger conditions — Not started
- Safety limits — Not started
- Automation and approval — Not started
- Recovery behavior — Not started
- Notifications — Not started

What should this action prioritize?

- **Maintain supply reliability** Recommended
- Reduce grid purchase cost
- Avoid peak grid demand
- Maximize renewable energy use

Recommended because this site is currently operating in Reliability mode.

Use recommendation | Explain recommendation

Prioritize supply reliability.

Configured. I'll prioritize maintaining supply to site demand while protecting the battery reserve.

Which battery can I use for this action?

Battery 1 Recommended
Available | Current charge: 72% | Max discharge: 8 MW | Health: Normal

Battery 2 Maintenance scheduled
Charge: 64% | Not available for automatic actions

Use Battery 1 | Let BOB choose | Select multiple

Battery 1 is recommended because it is available, has sufficient stored energy, and has no maintenance restrictions.

Ask BOB to configure, explain, or change an action
