Latest analysis · 01 Oct 2026, 14:32 IST

Pending grid-import approval

Kuppam Solar Site is generating 38 MW. Demand is 44 MW. Battery 1 is discharging 6 MW to support the shortfall. No surplus is available for export.

Operational impact

Battery SOC is 72%. The current discharge rate can support the expected shortfall for approximately 90 minutes.

Current response

BOB is discharging Battery 1 at 6 MW to meet demand. One grid-import approval is pending.
